Dimensions:	DUP-07 H: 468 mm, B: 188 mm, D: 527 mm DUP-11 H: 660 mm, B: 188 mm, D: 527 mm DUP-15 H: 839 mm, B: 188 mm, D: 527 mm		
Weight:	DUP-07 14,5 kg	DUP-11 20,4 kg	DUP-15 25 kg
Agency Approvals:	UL, CE, FCC Class B		
Warranty:	2 year parts and labor (except recorders)		

Copy CDs and DVDs Fast and Easy

Primera's new DUP copies up to fifteen CDs or DVDs at a time at the fastest speeds currently available. All current formats are supported, including CD-R, DVD-R, DVD+R and even DVD±R Dual Layer.

Easy To Use

Place a master disc in the top drive, load up to eleven blank discs, and press "AUTO COPY." In just minutes, you'll have fifteen perfect copies of your data, music, video or virtually any other digital information.* A built-in 160GB hard drive allows you to store jobs for later use.

Many Applications

Tower duplicators – as opposed to disc publishers like Primera's Disc Publisher II or Disc Publisher Pro – are typically used when many identical copies are required in a very short period of time. Churches, schools, service bureaus, live events and concerts as well as many other users find this to be their best solution.

Optional Manual or Automated Printing

Use one of Primera's award-winning direct-to-disc printers to pre-print your discs for the fastest throughput. For low-volume, one color manual printing, choose the Signature® Z1 CD/DVD printer. For higher-volume, full color automated printing, choose the Disc Publisher II AutoPrinter (50 discs) or Disc Publisher Pro AutoPrinter (100 discs).

Reliability and Long Service Life

The DUP-15/DUP-11/DUP-07 uses a unique, aluminum chassis and frame while most other tower duplicators use painted steel. Aluminum is more expensive, but more efficiently dissipates heat. This important difference translates into longer life of the recorders as well as other components inside your new duplicator.

Blu-ray Support

All three copy towers are also available as Blu-Ray versions. The Blu-Ray towers are the same as the DVD versions but are equipped with the latest Panasonic BD burner drives which can produce CD-R, DVD±R, DVD-DL, BD-R and BD-DL.

Primera is a member of the Blu-ray Disc Association and the world's first manufacturer of automated disc publisher to announce support for the Blu-ray Disc technology.
