

REWINDER for LX800 - Series

All-in-One rewind and unwind label rolls!

- Time-saving new accessory
- Compatible to Primera's LX800 colour label printer series
- Easy To Use
- No more self-rewinding of labels

No More Annoying Self-Rewinding of Labels

The new LX-Rewinder spares you the trouble of self-rewinding printed labels on label cores and is therefore effectively time-saving.

Smooth Production Process

As soon as you connect the LX-Rewinder to a printer, a great amount of labels can be produced smoothly and continuously.

An acoustic signal informs the user that the rewinding process has stopped and a new one can be started.

Plug In and Go

The LX-Rewinder is compatible to each printer of the LX800/810 series. After installing the LX-Rewinder just connect

the power supply cable and you are ready to go. Then load an empty label core and attach the label output to the core. The LX-Rewinder is now ready for perfect rewinded label rolls – ready to use.

Flexibility and Stability

Because of a flexible adjusting shaft cores of any diameter and width can be used. The rubber stoppers placed on the LX-Rewinder fit the feet of the LX-printer perfectly. That way both units are safely interlinked. In addition,

an arm support can be installed to increase the stability of the Rewinder.
